

Note: Before you extract all files in you're xammpp make you delete the the existing file or the old file in htdocs and in database import the new updated database to update all files on youre system.

Landing Page Link to Open

localhost/BrgyInfoSytem/index.php

Additional Features

1.Landing Page

2.Barangay Clearance in Admin

-Uploading

-Downloading

-Print the Files

-View and Delete

Note: For better compatibility for viewing Pdf file is prefer, because pdf viewer is built -in in all browser, but if your file type is docx for uploading cannot view in your system redirect for downloading before you open and print the file.

3.In you Admin Dashboard add a BUTTON

-This button is allow the admin to disabled and enabled the sign up form if you're account is exist because for security reason.
